## Experience

### Web Developer Volunteer at Leap Forward

December 2022 - Present

Website under construction

- Working independently to develop the company's new website using languages and technologies such as HTML, CSS, JavaScript, jQuery, and Bootstrap.
- Convert mockups into live web pages.
- Upload premade web pages to WordPress.

### Web Developer Volunteer at DeafandHoH.com

July 2022 - Present

[DeafandHoH website](#)

- Used various technologies, including HTML & CSS to make code repairs and optimize website.
- Converted mockups into live webpages using WordPress, HTML, and CSS.
- Make updates to websites using WordPress, occasionally using HTML & CSS for custom changes.
- Develop emails to be sent out to subscribers.
- Occasionally design graphics to be used for websites and emails.

### Code Coach/Admin Assistant at theCoderSchool

November 2020 - August 2022

- Conduct private and semi-private coaching sessions teaching students concepts in languages such as Python, C#, C++, Javascript, and HTML/CSS.
- Run coding camps with 5-12 students enrolled, aged 7-13, a curriculum-based lesson plan based on the theme of the code camp.
- Write recurring app reviews for each student to keep the parent updated on their student's progress.
- Organize large amounts of information using excel sheets and documents.

## Projects

### Personal Portfolio

[Link to portfolio](#)

- A portfolio website designed and developed by me for me. This website was developed using HTML, CSS, JavaScript, JQuery, and Bootstrap.

### Pricing Component

[Link to project](#)

- A pricing page for a mock company selling AI budgeting services. This projects was developed with UX and UI design principles in mind. Developed using HTML and CSS
